From the desk of … Tim Tygart

Welcome to our catalog!

We love to meet fellow Chevy fanatics, and talk about our favorite cars. But for many of our customers, the catalog is the only direct contact they will have with our massive inventory of Chevy treasures. So we have worked hard to make it easy to use.

Our warehouse is stuffed full of hard-to-find Chevrolet goodies, which we have been acquiring for over 40 years. That's right; we began in 1968, well before many people thought that Chevy's from the fifties and sixties would ever be collectible.

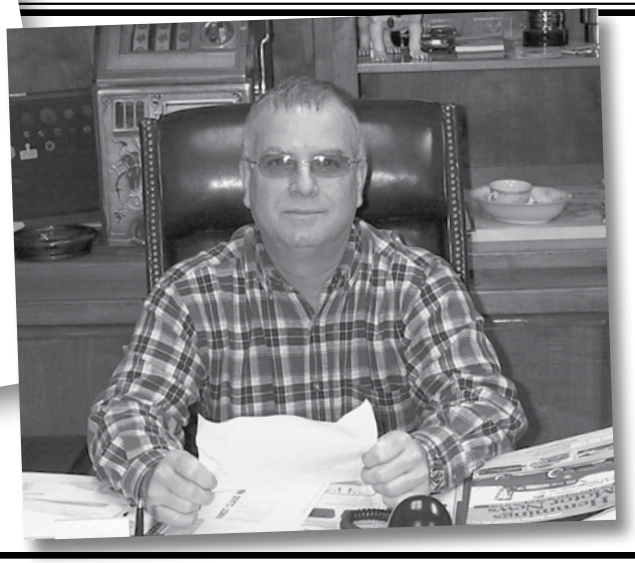
To you, this means that we have many parts that you simply cannot find anywhere else. Obscure parts that are no longer available from GM, yet are not being reproduced, are often waiting on our shelves for your call. And since we have been in the business for so very long, we also have the finest selection of top quality reproduction parts available anywhere.

Call our sales staff today. You will find them to be courteous and helpful. More importantly, they really know these Chevy parts. Most of them have been with us for many, many years. Get your Chevy parts from fellow Chevy lovers. We appreciate your business.

Sincerely,
Tim Tygart

We have been stockpiling Chevy parts since 1968. That's over 40 years! So we have tens of thousands of hard-to-find New Old Stock (NOS) Chevy parts in stock, awaiting your call.

Tim Tygart's OBSOLETE Chevy Parts Co.



How to use this catalog

This catalog is arranged just like the Chevrolet factory parts manuals. That means that we list everything by its original factory "Group Number". General Motors came up with their system many years ago: wherein parts were sorted by the various systems they were part of, or "Groups". For example, Electrical parts are all listed under "Group 2.000". Therefore if you need generator brushes, a starter solenoid, or a distributor cap, you would turn to the "2.000" section. When you get to the first page of that section, look for exploded view pictures, in which the various parts are identified with little "call-out" captions, with lines directing your eye to the picture of the part. The caption will list the number within the "0.000" group. From our examples above, let's search for a distributor cap. In the exploded views, you'll find that the distributor cap is described by the photo caption as "2.367 Cap". To find that part in the listings, merely start at the beginning of the 2.000 section and follow numerical order until you get to 2.367, where you will find distributor caps listed. Note that all distributor caps are listed under that identical Group Number. Within the group, you'll find the listing for your car, and the individual cap that you need will have its own unique part number. Use the part number only for your order. Group Numbers are solely for organizing the parts within the catalog to make your searches fast and convenient.

Decoding the Factory ID Plate

Please refer to the I.D. plate on the firewall to determine your style number.

Be a vintage Chevy detective! *Look for clues about your car or truck's origin on the factory ID Plate. It's a metal tag normally found on the firewall, mounted in place with two rivets or screws. It contains codes about the build date, original paint color, and original interior. Use our handy Code Charts found on these pages to read the codes you find.*

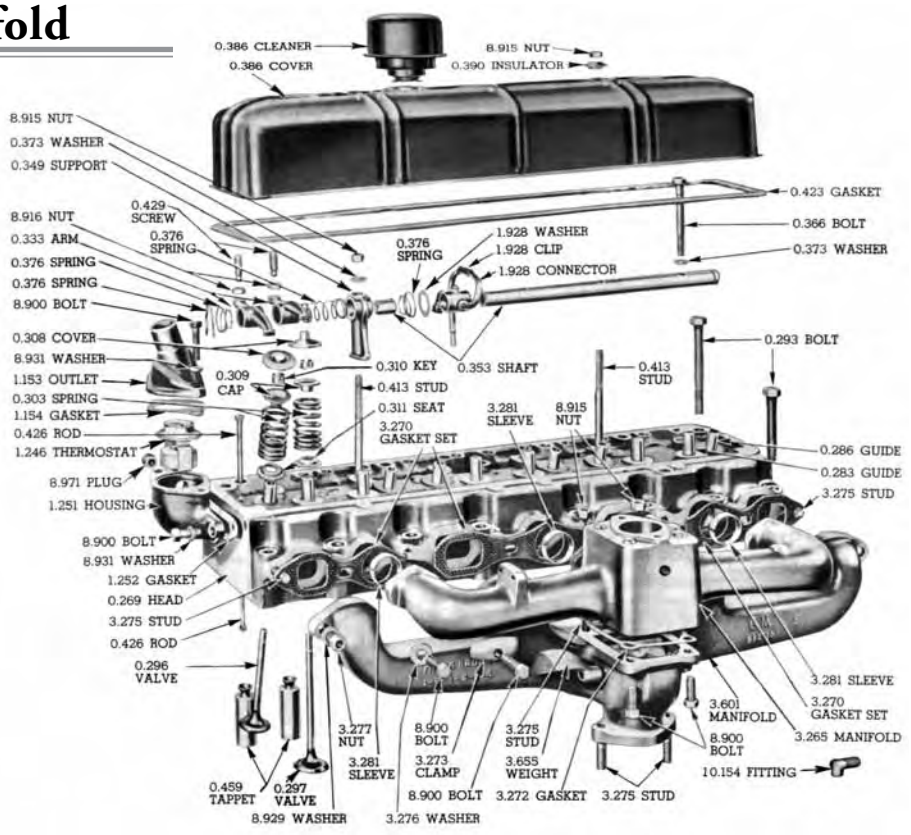
Cylinder Head & Manifold

Please Note:

The diagrams on these two pages are helpful for finding the parts you need for your own engine. The number listed with the arrow pointing at a part is the "Group Number" that you can use to guide you to the correct section of this catalog.

If you need a little help, just give us a call. Our knowledgeable staff is waiting to assist you.



Engine Block

Our sales staff really knows your Chevrolet. Call them for anything you need, whether you plan to restore or hot rod your project.

Here at the Obsolete Chevy Parts Company, we're proud to stock so many New Old Stock (NOS) and original Chevrolet service parts for these proud old engines, as well as today's finest available replacement parts. Call our trained professional sales staff for any parts you need for a Chevy engine. We're waiting for your call!

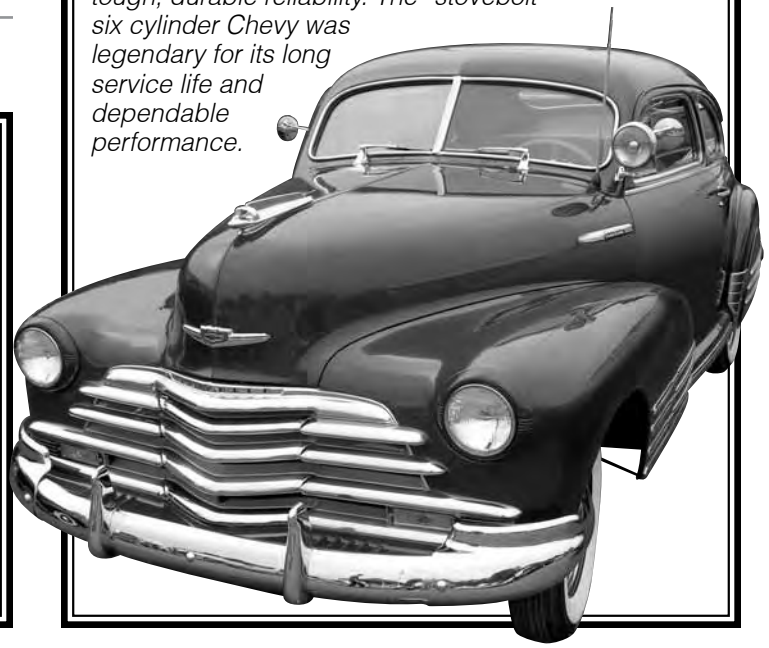
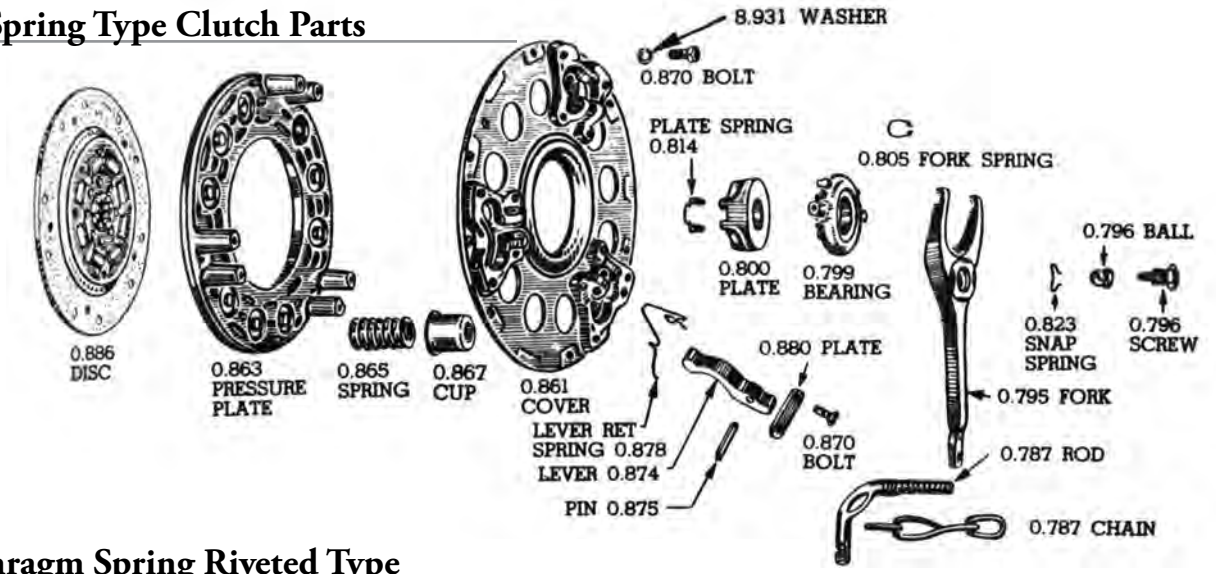
Chevrolet engines have always been famous for their tough, durable reliability. The "stovebolt" six cylinder Chevy was legendary for its long service life and dependable performance.

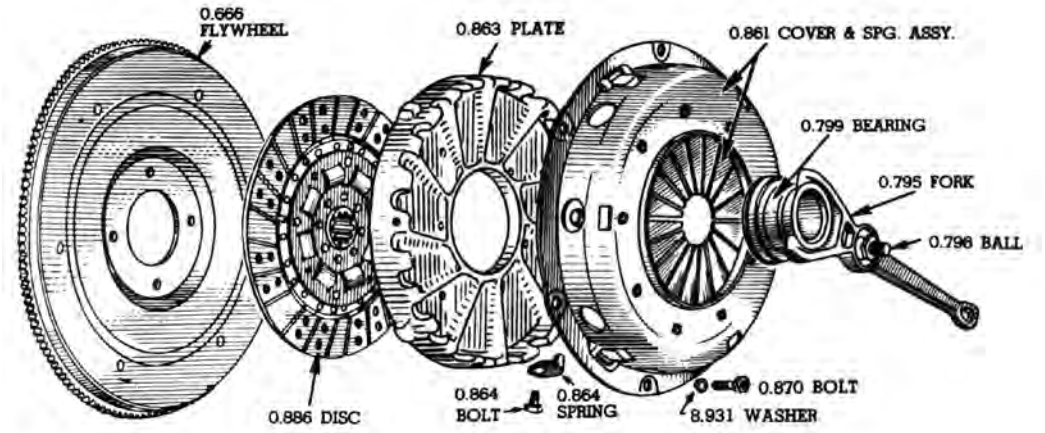


Clutch Parts

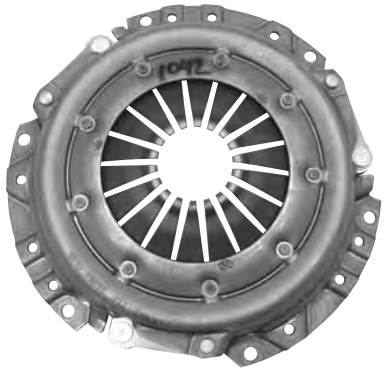
Coil Spring Type Clutch Parts



Diaphragm Spring Riveted Type Clutch Parts



Newer Style Replacement Clutch Kit



We drivers sure are tough on poor old clutches! We ride them, slip them, grind them, overheat them, and subject them to tremendous pressure and friction. To get even with us, they chatter, slide, and eventually quit altogether! Put a brand new clutch assembly in your Chevy, and treat it nicely with a new Throwout Bearing, Pressure Plate, Return Spring, Pilot Bushing, and any other related parts with signs of wear or damage. Your Clutch will reward you with smooth, powerful performance.

Tim's Tip:

Clutch assemblies are fairly simple, straight-forward mechanical systems… until heat and friction combine to wear them out!

Often someone will install a new clutch disc, only to experience chatter, slipping, or "grabbing" when they reassemble their car or truck. The key to a smooth operating clutch is to replace ALL the worn parts.

Often the springs in the pressure plate lose their tension over time, allowing excessive slippage. The little pilot bushing in the end of the crankshaft is vital too, as it is responsible for keeping the transmission main shaft properly aligned under torque conditions.

The flywheel must have a smooth, crack and heat-spot free surface. It's always wise to have a machine shop turn down the flywheel to achieve a good surface, on every clutch replacement. (Also be sure to check the teeth on the flywheel ring gear while you have the flywheel out.)

The throwout bearing may look good, but it's a good idea to replace it every time you have it out of the vehicle, due to the tremendous heat and friction it must endure.

When you have good quality components in new condition in place, then adjust the clutch according to your shop manual. Then you can normally expect good smooth and powerful performance from your clutch system.

1.219 Reproduction Radiators

Reproduction radiators are available for 1937 and newer cars. These are built to fit the original radiator support but can be purchased with extra cooling capacity for larger engines. All will accommodate automatic transmissions. Some are special order and require 3-4 weeks for delivery.

We offer replacement radiators in three cooling capacities. All come with transmission cooler for automatic transmission. Please specify what engine came originally in the car and also what engine is currently in the car. Original V8 and 6 cylinder radiator supports were different. The radiator mounted on the front side for 6 cylinder and on the back side for V8. We offer radiators for cars that have the original 6 cylinder support but now have a 8 cylinder engine.

Electrical: Ignition

The electrical system is often the culprit whenever there is a problem in a vintage car that doesn't get driven on a day-to-day basis. Old contacts corrode, wires get brittle and things don't work right anymore We recommend that you replace old electrical items on your car whenever you remove them from the car. New quality parts add to the reliability and enjoyment of any old car.

6-Volt Alternator

Now, enjoy the benefits of a modern alternator in your Chevrolet's original 6-volt electrical system. Plugs into your vehicle's original wiring harness. No need for an external voltage regulator with points that can fail. Get 60 amps of output, at 7.5 volts. Eliminate sluggish starts caused by undercharged batteries. Call now for full details.

Tim's Tip:

Battery Cables

Did you know that battery cables literally "wear out"? Years of temperature extremes and exposure to toxic battery fumes leaking from the case around battery posts can cause corrosion to seep up underneath the insulation, and wick its way well up into the copper wiring. This, reduces the amount of voltage that can travel through the wire to and from the battery. If the battery cables on your Chevy or GMC truck are several years old, it may be a worthwhile investment to replace them with brand new units. It's better than having a won't-start crisis at the cruise-in!

Electrical: Distributor

Distributor & Distributor Parts: 2.361 thru 2.410

You can read the date code on the little aluminum ID tag on your distributor, to find out when your distributor was manufactured. In the example shown, this distributor has a series of stamped numbers. The first seven digits are just the part number of your distributor, which can be found in a GM parts catalog. The three letters that follow are the date codes, "5H3". The first digit, "5" is the year, in this case 1955. Next, "H" is the eighth letter of the alphabet, and represents the 8th month, August. The "3" merely represents the third day of the month. So, this example distributor was built on August 3rd of 1955.

Electrical:

The Batter Tender Junior

The Battery Tender Junior is much more than a trickle charger. It has a brain. It's lightweight, compact, and fully automatic; very easy to use, especially in small spaces. It will keep your battery fully charged so that it is ready to go when you are! Available for 6 volt or 12 volt systems.

- Perfect for all lead-acid, flooded or sealed maintenance free batteries (AGM and gel cell).
- Complete 4-step charging program (Initialization, Bulk Charge, Absorption Mode, Float Mode).
- Automatically switches to float / maintenance voltage after fully charging the battery.
- If the battery voltage drops too far under load, full charger output power resumes.
- Solid state two color LED indicates stage of charger
- Spark proof
- 12' output cord
- Reverse polarity protected
- 5 year warranty

Those little Rubber Bumpers may be the most underrated components on any collector vehicle. They cushion and align everything from hoods and trunks to glove box lids, seat backs, gas filler doors, and even license plates. Often they are missing when a collector acquires a project vehicle, so the new owner doesn't even know they are needed. Get all the rubber bumpers for your Chevrolet today.

See page 108.

Get the right top for your 1955-57 Chevy, and enjoy the way your car looks with the top up or down. After many years of helping our convertible customers restore their ragtops, we've learned to use only the finest available tops for long life and authentic appearance. And please always remember when you're replacing your top to install all new related rubber and weatherstripping, plus a new well which protects your top when it is folded down. And of course, a beautiful new boot looks great in the sun, wrapping around your back seat and covering the folded top. Call today and order a new top for your convertible.

Tim's Tip:

Keep Up Your Electrical System

Keep your Chevy or GMC truck's electrical system in shape! Nothing is more embarrassing than showing up at a cruise-in or car show with a beautiful truck that doesn't run well, or fails to start when you hit the key.

Make sure your fan belt is properly tightened. Carefully clean the battery cable ends, and don't put grease or other goo on the battery posts. Inspect and tighten all wire connections; including the vital ground straps. Make sure you have a good, functioning voltage regulator and generator (or alternator). Charge your battery, and have it tested by professionals with testing equipment. Check ignition wires for corrosion, and use a meter to check for conductivity. Look for cracks or carbon lines in your distributor cap and rotor. Replace points, condenser, and rotor annually. Examine your spark plugs for evidence of clean firing… or problems. If you're not sure how to do the testing, get a manual from this Obsolete Chevy Parts catalog, or take your truck to a skilled professional mechanic. Then, the next time you get ready to go to a car show, you'll know your truck is as ready as you are.

FUEL & EXHAUST SYSTEM: 3.000 THRU 3.932

3.001 – STAINLESS Gas Tanks

Reproduction stainless gas tanks are available for most years. Some are for Street Rod applications. Stainless mounting straps are provided with those tanks which require them. These are special order only. They must be prepaid and will be drop shipped from our supplier in 6-8 weeks. Average Shipping cost is $45.00.

49-52	Includes straps	51CPS	235.00	ea
53-54	Includes straps, filler tube & cap *(pictured, above right)*	53CPS	255.00	ea

1941-54 Gas Tanks

Made for cars with fuel injection. Tank has a place for the pickup line, return line and vent hose. When using on an original car, you will have to plug the return line and possibly the vent line. Originally the gas line usually came from the back of the tank, you will have to make a new gas line to go to the front of the tank. Tank uses #4192840 Universal sending unit but it must be turned around to clear the baffle.

41-48	16 gallon tank *(pictured)*	4148CPS	200.00	ea

3.001 – STEEL Gas Tanks

1931-35 Steel Gas Tank

31-32	Includes cap, 15 gallon tank, 2 1/2" deeper than original, 35" x 11" x 10"	32C-A	300.00	
34-35	Standard series cars, 2 1/2" deeper than original, 35" x 12" x 10 1/2"	34STD-A	300.00	

1935-40 Gas Tanks

Die stamped steel and coated for rust protection, these 14 gallon capacity tanks accept stock and aftermarket 5-hole sending units. Oversize 3/8" OD internal pickup tube in the stock location works great for 6 cylinder, but won't starve a V-8. 16-1/4" x 37-1/2" x 7-1/2" deep.

35-36	Master	36CG	215.00	ea
1937	Doesn't fit Business Coupe	37CG	215.00	ea
38-39	Sedans only	38CG	215.00	ea

Also available, a frame-mounted tank with the above features. 16-1/4" x 39-3/4" x 7-1/2" deep

1940	Frame mount	40CGTANK	240.00	ea

Warning! Danger!

Obviously, gasoline is highly flammable and explosive. Nevertheless, each year lives and property are lost due to careless handling of gasoline around collector vehicles. NEVER use an incandescent light anywhere around gasoline or fuel tanks… including trouble lights. Cool gasoline will cause a hot light bulb to explode, which can be fatal. Unless you know exactly how to safely remove or repair a used gas tank, leave that job to professionals.

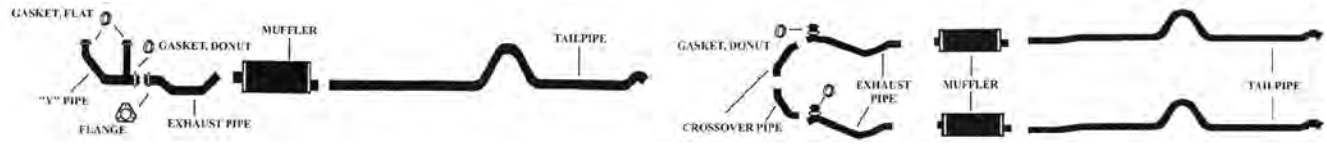
FUEL & EXHAUST SYSTEM

1955-1957 Exhaust Systems



These exhaust systems, manufactured by Schafer's Classic Reproductions, are available in heavy 16 gauge aluminized steel tubing with aluminized (inside and outside) mufflers or in 304 grade stainless steel with stainless steel mufflers. The mufflers are the correct sizes: 23" body size for 1955, 1956 and 1957 Convertibles. 1957 Sedans and Hardtops have a 29" body size. All of the tailpipes are notched at the tips like the originals. Each system includes the exhaust header pipes and the two header pipe flange gaskets as required. Heat risers must be ordered separately.

Other features:

- *All tubes are Mandrel bent. No kinks in the bends, no flat spots or reduction in the tube diameter in the bends.*
- *All pipes are bent on a C.N.C. tube bending machine like the OEM's use. Quality is assured through computerized measurement systems after the pipe is bent.*
- *1957 Exhaust header pipes are formed like the original pipes using a one piece formed pipe which reduces the chance of exhaust leakage between the exhaust pipe and the exhaust manifold.*

Clamp / Hanger Kits are available in cadmium, and stainless will be available soon. Prices start at $60.00.

Exhaust systems are available for all body styles, 6 cylinder or V8, and single or dual exhaust.

Aluminized kit prices range from $177 to $490. Stainless kits start at $415.

Kits are dropshipped from the supplier. Prices do not include shipping.

Tim's Tip:

GAS GAUGE & SENDING UNIT TIPS:

These simple procedures will help you determine if you need to replace the dash gauge or the sending unit in the tank.

Trouble Shooting:

When you turn the ignition key on, what does your gauge needle do?

Gauge needle does not move:

Gauge and sending unit may both be defective. Take the sending unit wire off at the tank. Turn ignition switch on, if the gauge needle does not move the gauge is defective. If the needle goes to full, ground the sending unit wire to a body ground, needle should read empty. If this happens, the sending unit is defective.

Gauge needle stays on full:

Take the sending unit wire off at the tank and turn the ignition switch on. If the gauge goes to Full, ground the sending unit wire to a body ground and gauge needle should go to empty. If so, the sending unit is defective. All sending units prior to 1964 are 30 ohms.. Most after-market gas gauges and sending units are not 30 ohms.

More troubleshooting hints:

- *Always check wiring, make sure the gauge is getting power.*
- *Check ground. The gauge cluster needs to be grounded. We always paint everything when restoring our own vehicles. If you have an electrical problem, always check for a grounding problem first.*
- *Add a ground wire to your sending unit. Most vehicles do not have this wire. Go from one of the mounting bolts over to the body.*

TANK SENDING UNIT TROUBLE SHOOTING:

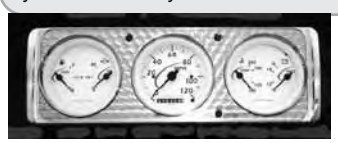
Remove the sending unit from the tank. Use a good ohm meter. It should be able to check continuity down to X1. If the meter only goes to X10, the needle will not move enough for you to see it.

Installing a new sending unit:

Before installing sending unit in the tank, hook up the wire from the dash gauge. Run a ground wire over to the body and turn the ignition switch on. Move the float up and down. Check the dash gauge to make sure it is working properly.

12 Volt Systems on original 6 volt vehicles

Tank sending unit will work on 6 or 12 volts, but a 6 volt dash gauge will not work with a 12volt system without installing a voltage reducer, item # EL110. This reducer is for the gas gauge only. If your dash gauge has already been damaged, you can have your old one rebuilt and converted to 12 volts.



Street Rod gauge clusters also available.
See pages 82-83.

Old gas tanks are usually filled with old rust, dirt, muck, and other potential problems for your carburetor to deal with. A brand new gas tank is the best way to guarantee that nothing but clean, fresh gasoline will be pumped into the tiny jets and other orifices in your carb. Find one on page 35, and enjoy smooth, reliable performance.

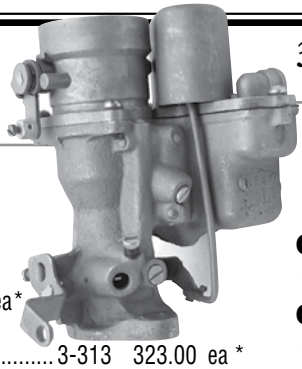
One of the most common causes of poor engine performance is the carburetor. This is especially true of older collector vehicles, which spend much of their lives sitting silently in a garage. After several weeks, old gasoline begins to break down and turn to "varnish" in your fuel system, which will clog up the tiny jets and orifices in the carburetor. Rust, moisture, and debris gather in the tank, and then get pumped into the poor carburetor every time you start the engine. Years of alternating between soaking in gas and then drying out, and then soaking yet again will ruin the gaskets in any carburetor too. Rebuild the carburetor in your favorite Chevy with one of our complete Carburetor Gasket Sets, for smooth reliable performance on the road. Or, better yet, order a newly Rebuilt Carburetor for convenient bolt-on installation.



3.725 –Carburetor

We can have your Carter W-1 carb rebuilt – $210.00

Fuel pumps are notorious for sudden failure without warning. It shouldn't come as a surprise, when you think about it. The fabric diaphragm inside is pounded up and down thousands of times per minute for years, pumping gasoline out of the tank and up into the carburetor. If any dirt or corrosive elements find their way into the tank, they will be pumped into the poor Fuel Pump, adding to the normal wear and tear caused by heat, cold, friction, and father time. The problem with Fuel Pumps is that they tend to work fine right up until the moment when they quit completely, leaving you with an engine that simply will not run. And of course, that always happens at the worst possible time! Drive your Chevy with confidence, knowing you have a precision rebuilt Fuel Pump from Obsolete Chevy Parts.

Get the right top for your 1955-57 Chevy, and enjoy the way your car looks with the top up or down. After many years of helping our convertible customers restore their ragtops, we've learned to use only the finest available tops for long life and authentic appearance. And please always remember when you're replacing your top to install all new related rubber and weatherstripping, plus a new well which protects your top when it is folded down. And of course, a beautiful new boot looks great in the sun, wrapping around your back seat and covering the folded top. Call today and order a new top for your convertible.
Page 94

PowerGlide Transmission Master Kits

Master Overhaul Kit (31002) would include the Master Gasket Kit plus fiber and steel clutches. Master Gasket Kit (31031) is shown at right. Kit 31001LS would include the Master Gasket Kit (31031) plus the fiber clutches.

Master Overhaul Kit

Includes gaskets, rubber lip seals, rubber "O" rings, friction lined clutches, steel clutches, front pump seal, extension housing seal.

Everyone knows that the brakes are the most important safety system on any car or truck. Drum brake systems are fine for daily driving in a collector car, IF you keep them in top operating condition. Check inside your master cylinder for signs of muck or rust. Inspect all mechanical parts regularly. Keep brakes properly adjusted. If you are unsure of how to properly maintain your brakes, take your car to a professional technician. And call Obsolete Chevy Parts for all your brake system needs.

Disc Brake Kits

Modern disc brakes are vastly more efficient and safer than old outdated drum brake systems. If you have installed a more powerful engine in your vintage Chevrolet, then you must be sure you have a brake system which has been designed to handle greater power and speeds. The following Disc Brake Conversion systems are convenient ways to upgrade the brakes on your car. They are a much better choice than mix and match used parts from a junk yard. Get a brand new complete Disc Brake Conversion Kit, and put the "whoa" back in your old Chevrolet.

(NOTE: Your brakes are the single-most important safety system on any car. If you are unsure about installation, get a certified automotive technician to install your Disc Brake Conversion Kit.)

4-Wheel Disc Brake Kit

Kit is used with stock spindles and we recommend using 15" wheels. Includes 11" front and rear rotors, calipers with pads, bearings, seals, mounting hardware and brackets, dust caps, spindle nuts and rubber brake hoses, booster with master cylinder, brake cables with connectors,

55-64	.....	FRBKS5564	1,399.60	kit

Front Disc Brake Wheel Kit

Kit is used with stock spindles and we recommend using 15" wheels. Includes 11" rotors, calipers with pads, bearings, seals, mounting hardware and brackets, dust caps, spindle nuts & rubber brake hoses.

28-40	with straight axle, except 1933-36 Standard	DB1701B	589.00	kit

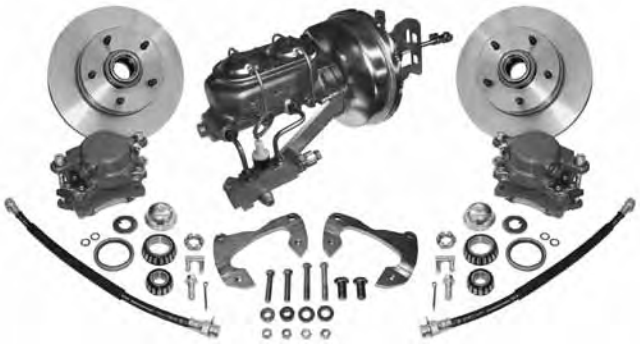
55-64	Uses large GM calipers	WBKS5564A	415.00	kit
55-64	Uses small GM calipers.....	DB1711B	352.75	kit

Kit includes 2" dropped spindles, 10.5" rotors, calipers with pads, bearings, seals, dust caps, spindle nuts & rubber brake hoses.

55-57	Uses small GM calipers.....	SWBKD5557	475.90	kit

Front Disc Brake Complete Kit



Includes the wheel kit for stock spindles plus the master cylinder, 7", 8" or 9" booster, proportioning valve with brackets and hardware.

55-64	Uses small GM calipers, stock	CBKS5564	600.00	kit
55-64	Uses large GM calipers, stock.....	DB1711P	691.50	kit

Includes the wheel kit with 2" dropped spindles plus the master cylinder, 8" single diaphragm booster, proportioning valve.

55-57	Uses small GM calipers.....	DB1711PD	760.80	kit

BIG BRAKE KITS

This kit not only upgrades your vehicle to discs, but you can also lower it 2" without affecting the steering geometry. These kits have a matched caliper system designed for muscle cars. Use with 17" or larger wheels. Kit includes 13" cross drilled and gas slotted rotors, 38mm dual piston aluminum PBR calipers, 2" dropped spindles, high performance brake pads, bearings, seals, hubs, brake hoses, grease caps, spindle nuts, mounting brackets, Raybestos Super High performance Dot 3 Brake fluid.

55-57	.....	SWBK13D5557	1,062.60	kit

This kit was developed for those who want the same features as the big brake kit, but do not want to run 17" wheels. Kit features full floating finned aluminum dual piston calipers. Kit includes 11" cross drilled and gas slotted rotors, polished dual piston aluminum calipers, brake pads, bearings, seals, hubs, stainless brake hoses, grease caps, spindle nuts, mounting brackets, Raybestos Super High performance Dot 3 Brake fluid.

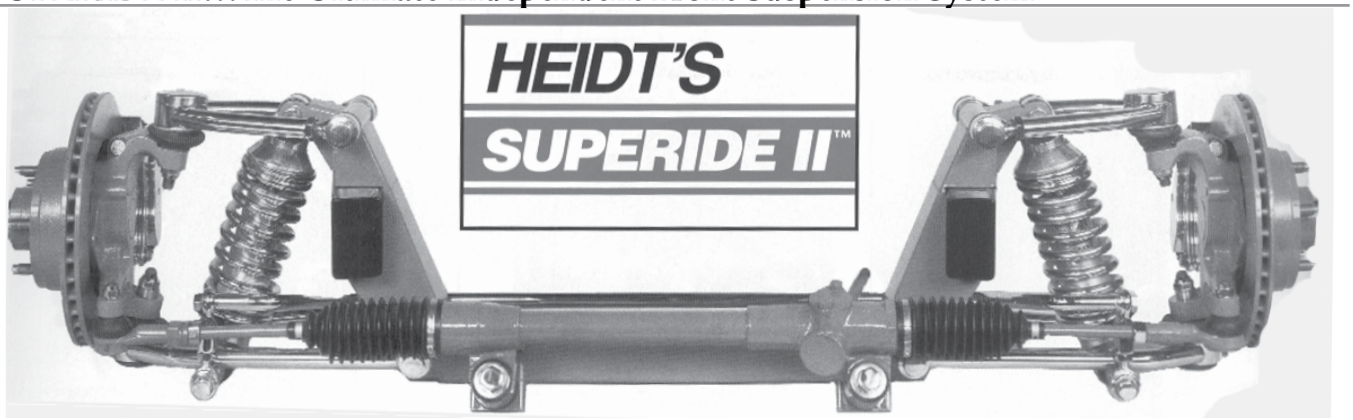
SUPERIDE II…The Ultimate Independent Front Suspension System



Superide II IFS System for 1937-48 Chevy car uses the Mustang II dropped spindle with front mount rack & pinion unit to ease motor installation. The upper control arm uses threaded adjusters for wheel alignment to avoid the "slip" you can get with eccentric adjusters.

$2,999 Complete

KIT INCLUDES…

- Main crossmember T.I.G. welded for maximum strength and great looks
- One piece dropped Mustang II spindles
- Adjustable tubular arms
- Adjustable coil-over shocks with chrome springs
- 11" Disc brake vented rotors
- Front-mount rack & pinion steering
- Factory ball joints and tie rod ends

OPTIONS AVAILABLE…

- Polished Shock Bodies .....add 80.00
- Stabilizer Bar .....add 165.00
- Ball Joint Caps, pair.....add 55.00
- Power Rack & Pinion.....add 187.00
- Stainless Steel Brake Lines.....add 35.00

Tim's Tip:

Tim's BEST Tip of All!

If you have a vintage Chevrolet, get the shop manual for that specific model! So much useful information is right there at your finger tips. *See page 128. Also see our shop manuals on CD, for the ultimate in convenience!*

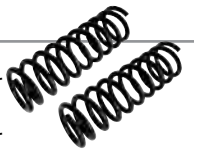
Order your parts online right now, at
www.obschevy.com
It's fast, easy and convenient!

Stage 2 Suspension Kit

Kit includes front coils (choice of stock height or 1.5" drop), rear leaf springs (choice of stock height or 2" drop), mounting hardware, front and rear sway bars and front and rear 3 way adjustable shocks.

55-57 ..... S2K5557 1,122.75 kit

Front Coil Springs



55-57 Stock height for Big Block ..... CS656 137.00 pr
55-57 Stock height for Small Block *(pictured)* ..... FCS638 126.25 pr
55-57 1.5" drop for Big Block ..... FCS656D 130.90 pr
55-57 1.5" drop for Small Block ..... FCS638D 107.80 pr

Deluxe Front End Rebuild Kits

Kit includes upper and lower ball joints, inner and outer tie rods, adjusting sleeves, idler arm bushings, upper and lower control arm bushings and bumper stops.

55-57 with poly bushings, the urethane bushings contain graphite for lubrication *(pictured)* ..... SFK-P5557 399.99 kit
55-57 with rubber bushings ..... SFK-R5557 346.50 kit

Front Sway Bar

Help your vehicle handle better by adding a high performance sway bar. 1" bar with poly urethane bushings and hardware

52-54 ..... PO02070 150.15 kit
55-57 ..... PO594U 150.00 kit

Rear Sway Bar

Help your vehicle handle better by adding a high performance sway bar. 1" bar with poly urethane bushings and hardware

49-54 ..... PO150 263.00 kit
55-57 *(pictured)* ..... PO253U 150.00 kit

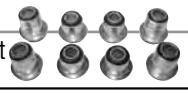
Control Arm

These tubular control arms are designed for the performance enthusiast. They are designed on extra 4.0 degrees of caster into the arm to make the vehicle drive straight and true. Arms include factory rubber bushings.

55-57 Lower arms ..... TCA-L5557 324.00 pr
55-57 Upper arms ..... TCA-U5557 300.30 pr

Control Arm Bushings

55-57 Poly, set of 8 ..... 3-3108G 92.40 set



Rear Axle Seat

When changing rear ends, it's always a good idea to install new axle seats. Made of 1018 cold roll steel, they have locating holes to help maintain proper rear axle alignment.

55-57 ..... RAS5557 29.95 pr

Rear Mono Leaf Spring

These springs will lower the rear of the car but maintain that retro look. These are ideal for high horsepower cars. These springs maintain the factory GVW and include new bushings and "U"-bolts.

49-54 3" drop, includes shackle kit..... RMS4954D 673.60 pr
55-57 Stock height..... RMS5557S 673.50 pr
55-57 2" Drop ..... RMS5557D 673.60 pr

Rear Multi- Leaf Spring

These springs maintain the factory GVW and include new bushings and "U"-bolts

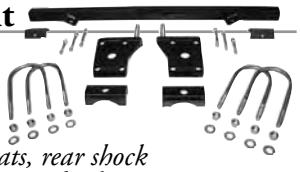
55-57 2" Drop ..... RMS5557D 673.60 pr

U-Bolt Kit

A common sense way to strengthen your high horsepower car's rear suspension. By using "U"-bolts instead of the standard hex cap screw to hold the rear end to the leaf spring, you will eliminate the chance of breaking the spring axle seat. The "U"-bolt will clamp the rear end to the spring tie plate greatly reducing the stress on the axle seat

55-57 Hardware included ..... UBK5557 32.35 kit

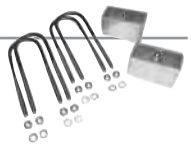
Rear End Conversion Kit



Complete rear end conversion kit. Allows for changing rear end to the more popular 10-12 bolt or Ford 9". Includes the "U"-bolts, axle seats, rear shock crossmember and upper and lower shock mounts.

55-57 ..... RCK-5557 172.50 kit

Rear Axle Lowering Block Kit

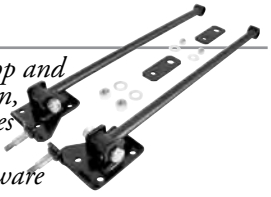


55-57 Specify 1", 2" or 3" drop, includes block & "U"-bolts with hardware ..... PO203 45.00 kit

Rear Shock Crossmember Kit

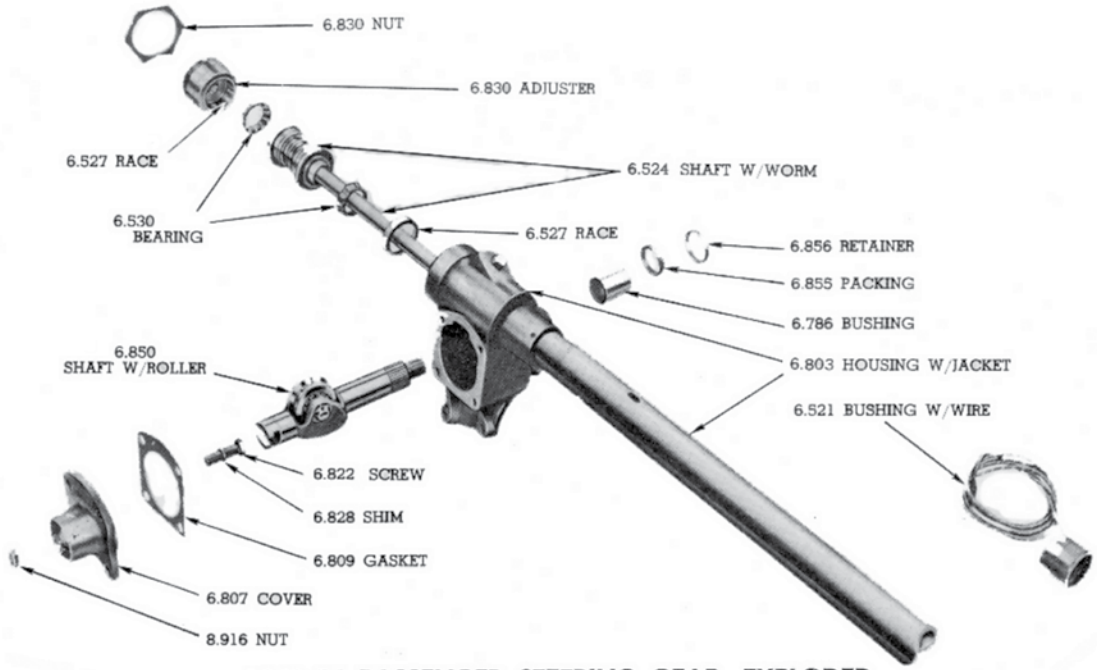
55-57 Fixes common problem found with original trunk mounts, includes crossmember& all mounting hardware..... RSM-5557 43.00 ea

Rear Traction Bar Kit



Designed to help reduce wheel hop and axle twist under hard acceleration, also increase traction. Kit includes tie plates with shock mounts, polyurethane bushings and hardware

55-57 ..... TBK5557E 147.00 kit



1949-54 PASSENGER STEERING GEAR—EXPLODED

STEERING GEAR PARTS 6.508 THRU 6.870

6.508 – Steering Gear Assembly

We don't offer complete gear boxes but have some of the repair parts. Refer to the diagram above.

Rack & Pinion Steering Kit

55-57	Power	8000490	862.92	kit *
55-57	Manual	8000230	862.92	kit *
55-57	Power, Chrome	8010400-02	970.92	kit *
55-57	Manual, Chrome	8000260	970.92	kit *

** Replaces conventional steering with state of the art rack and pinion gear. Engineered to have no bump steering. Mounts on the crossmember utilizing existing spring perch bolts, no welding required*

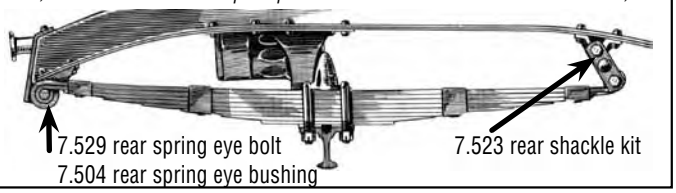
Springs & Parts

Other springs listed in Performance Suspension, page 68.

Your Leaf Springs and Coil Springs are the "muscle" of your suspension system, and must support the entire weight of the vehicle and all cargo. Hard cornering, heavy loads, and years of wear and tear will take their toll, and soon the car begins to sag in one place or another. It's often subtle at first, and sometimes people will use extended shackles, air shocks, or spring spacers to try and level the car again. But none of these temporary solutions can restore the "muscle" back into your suspension system.

Put a brand new pair of leaf springs or coil springs in your vintage Chevrolet, and enjoy driving it again.



7.427 – Front Spring Shackle Pin

Rear Axle Upper Bumper

55-57	1-1/2" tall, screw in type *(pictured)*	C53517	10.00	ea

Remember the lowly clips and fasteners! Body moldings and other trim items are often held firmly in place by small, inexpensive clips and other fasteners. We collectors rarely ever think of them, until they fail. Then an expensive piece of trim may hang loosely from the body, or even fall off while we drive down the road. Don't take chances; order new clips and fasteners for all your trim items.

Call the "original" source. We have been supplying hard-to-find parts and accessories for collector Chevrolet cars and trucks since 1968! Call Tim Tygart's Obsolete Chevy Parts Company today!

Tim Tygart's OBSOLETE Chevy Parts Co.

Get the right top for your 1955-57 Chevy, and enjoy the way your car looks with the top up or down. After many years of helping our convertible customers restore their ragtops, we've learned to use only the finest available tops for long life and authentic appearance. And please always remember when you're replacing your top to install all new related rubber and weatherstripping, plus a new well which protects your top when it is folded down. And of course, a beautiful new boot looks great in the sun, wrapping around your back seat and covering the folded top. Call today and order a new top for your convertible.

Dual Windshield Wiper System

by Specialty Power Windows

This universal 12 volt dual-wiper drive kit has 2 wiper shafts which accept arms that fit 1/2" fine spline knurls or 1/2" shafts.

The output shafts are driven by a remote mounted commercial duty 2-speed wiper motor with 300 in. lbs. Stall torque. The sweep is adjustable from 90 degree to 160 degree in 10 degree increments.

These kits are available with a 2-speed intermittent self park or 2-speed rotary (knob) switch kits standard self park switch kits. Two speed switch kits are available with either rotary (knob) or black rocker switch. All kits come with video and written instructions.

These kits are best suited for cars under construction or you may have to remove heater or other under dash components.

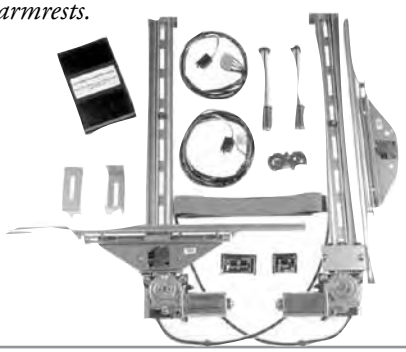
Power Wonder-Lift Kits

by Specialty Power Windows

The Power Wonder-Lift Cable Driven Motor kit is the most versatile power window kit available. Simple to install, this kit completely replaces your old crank handle & regulator. All 2 window kits come with chrome switches, either for console or armrests. The armrest kits will fit either Valley Auto Accessories or Big Al armrests.



Complete kit includes:

- Lower glass channels
- GM switches
- Wiring harness
- Written and Video Instructions
- Motor plugs and flexible stainless wire conduit for door opening
- Regulator, requires 8-1/2" of clearance beneath the glass and bottom of the door

29-54	Complete 2 window kit	PWL-2C	405.00	kit
29-54	Complete 4 window kit with chrome switches	PWL-4C	775.00	kit
29-54	PARTIAL KIT, does not include switches, harness or conduits	PWL-2P	295.00	kit

SPW Classic '55-57 Chevy Kits

Lifetime Warranty

Street enthusiasts who are updating their classic Chevy cars will appreciate these kits, which offer the late-model convenience of electric windows with easy installation. In all cases, the front door units are a straight bolt-in conversion. On the 2-Door Sedan and Hardtops, two holes are drilled for the quarter glass regulator (template provided). SPW Classic '55-57 Chevy Kits use the rugged GM-Style motors. The new GM switches provided are not exactly like the originals, these switches are not for original restorations.

If you have removed the vent window from a 2-Door Sedan, you will need to use the Power Wonder-Lift kit. 4- Door Sedans and Wagons should also use the Power Wonder-Lift Kit. (see above).

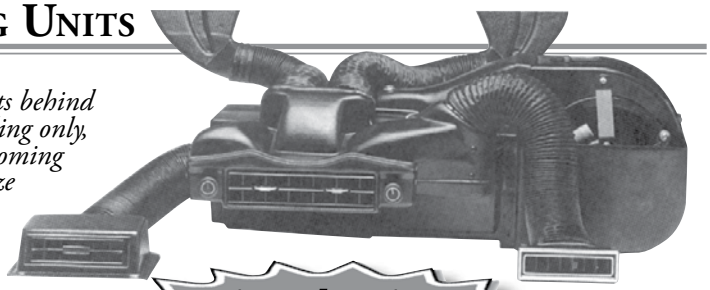
REPRODUCTION AIR CONDITIONING UNITS

by Vintage Air

Air Conditioning system manufactured by Vintage Air fits behind the dash or under the dash. Systems are available for cooling only, heat and cooling and heat-cool-defrost with the airflow coming through the dash, kick panels or without vent. Various size units are available from Space Savers to Super Coolers to accommodate any vehicle. Other options (example: chrome drier) and partial kits available.



Prices begin at $1150.00

Kits are available for:

1930-48 Chevy Street Rods, 1949-57 Cars, 1930-80 Chevy Pickup, 1962-72 Nova, 1964-72 Chevelle & 1967-69 Camaro.

Kits are special ordered. Price includes shipping.

Dash Control Panels

Various Dash Control panels are also available for these units.

Please call for availability

"SURE FIT" AIR CONDITIONING UNITS

by Vintage Air

Get true bi-level air flow and OEM quality "just right" temperature control. Vintage Air Sure Fit Chevrolet a/c, heating and defrost systems are designed specifically for your classic Chevy. New separate heating and cooling coils and SPAL permanent magnet blower motor give you the maximum capacity and performance. All parts to modify your factory controls. Sure Fit systems attach to existing holes in your dash and firewall in most cases.Get true bi-level air flow and OEM quality "just right" temperature control.

1955-57 Chevrolet Gen IV Sure Fit System Features:

- Electronic Servo Motor Controls, Including Heater Valve
- High capacity blower and separate heater and cooling coils
- Compatible with our options Gen-II proline control panels.
- Mounts completely behind dash
- Dehumidified defrost
- NEW! Our re-engineered Tri-Five Chevy Sure Fit kits now include Tite Fit compressor hard lines. Lines are now rerouted through core support and drier mounts behind. (see photo) These kits may be upgraded to include our polished Tite Fit line kit and our popular polished Proline compressor / alternator bracket.

Evaporator Kit

Air conditioning, heating and defrost combination designed specifically for your vehicle. Original deluxe control assembly in your dash connects to and controls this unit. Designed to mount to existing holes in your dash and firewall without drilling or fabrication. Evaporator kit comes complete with all mounting brackets, hardware, louvers, duct hose wiring harness and installation instructions.

Complete Kit

All of the above, plus condenser and drier package. Attaches to existing radiator mounting holes. No drilling or fabrication required. Available for V8 or 6 cylinder radiator position. Comes with condensor, mounting brackets, standard drier, pre-formed aluminum lines and mounting hardware.

***NOTE:** Some installations may require additional engine pulleys not included with kits. You must provide "V"-belts and refrigerant.*

Interior Kits

We can supply the original type seat covers, side panels, headliner & carpet. These are "Show Quality" interiors sewn to original factory specifications with original type fabrics. Seat covers are ready to install. The side panels are preassembled ready to install, with all fabrics & vinyls, door panel nails, wind-lace & arm rest covers for front & rear. Headliner also includes sunvisor material. Original type Daytona carpet is available in the original colors for 1955-56, sewn to fit with foam backing, correct binding & heel pad. Loop pile carpet for 1957 is as close as possible to the original. Replacement loop pile is available for 1955-56 also. Please SPECIFY exact year, body style & trim number when ordering. Interior kits must be prepaid. They will be shipped direct from the factory to you in approximately three weeks. Station Wagon, Nomad and 150 Series interiors are also available, please inquire.

Just about everyone will agree that the 1955-57 Chevy Nomads are the most beautiful station wagons ever made. Bring back that fabulous look to your Nomad with these extreme quality reproduction tailgate chrome strips and tailgate handle. Your best buy is kit number CMD 1398, which includes all of the above in one convenient kit. Call now!

WEATHERSTRIPPING

Keep out the wind and weather, while adding a "detailed" appearance to any vintage Chevrolet, with brand new premium quality reproduction Weatherstripping and other Rubber Parts. Eliminate rattles, leaks, cracked and unsightly rubber parts, and wind noise with a few simple steps. Door and Roof Rail Weatherstrips will add to the appearance of your open car doors, and return that "solid" sound when you push the doors closed. Trunk Weather-stripping will keep out those pesky leaks, and keep your trunk sheet metal safe. Window Weatherstripping will keep out leaks, and eliminate window rattles. Those little rubber bumpers must not be overlooked, either. They keep things from rattling or scratching your paint, and are vital for proper fit of various components. Call our experienced sales associates today for all your rubber needs, or visit us online.

Weatherstripping

10% Discount

Receive a 10% discount on weatherstripping when you order 3 or more of the following items:

windshield gasket, rear window gasket, door gasket, trunk weatherstrip, vent window gasket, hood to cowl seal, cowl vent gasket, rubber bumper kit, back body to bumper seal, roofrail weatherstrip and quarter window seals

1929-54 Wiring Harnesses

Original type cotton braided lacquer coated wire is used and generally utilizing the specified wire colors and color codes. Some special or unique connectors and terminals are not available and should be retained. When ordering, please include vehicle year, make, model and series. Replacement wiring harnesses include installation instructions utilizing the wire numbering system to simplify installation. Most harnesses are special order only and require 8 - 10 weeks delivery time. Estimate $15.00 for shipping.

1929-36

1929	with 3 wire armored cable to headlights	WH152	506.00	ea
1930		WH152A	431.00	ea
31-32	Standard	WH153	431.00	ea
31-32	Deluxe & Sport Sedan	WH154	490.00	ea
1933	Master with dual horns	WH155A	576.00	ea
33-36		WH155	576.00	ea
1936	Cars with voltage regulator	WH155B	655.00	ea

1937-39

1937-1939 also require additional harnesses for Country Horns or Town & Country Horns. 1939-48 also have additional harnesses available for clock, heater / defroster, and back up light harness for some.

1937	All except Business Coupe or Sedan Delivery with single horn	WH156	599.00	ea
1937	Master Deluxe Coupe & Business Coupe	WH156A	655.00	ea
1938	All with single town horn except Master Deluxe Coupe or Business Coupe	WH158	599.00	ea

MUSCLE CAR & STREET MACHINE WIRING KITS

by American Autowire System

Power Plus™ 18 System, available in 12 Circuit System

The Power Plus™ 18 is our "deluxe integrated fuse panel wiring system". This complete 18 circuit system combines a complete factory-terminated fuse panel with the benefits of our modular approach to wiring systems. with the Power Plus™ 18 system, the inconvenience of trying to mount the fuse panel with a huge bundle of wire attached is eliminated. The Power Plus™ 18 panel contains necessary passenger compartment lead wires and modular plugs for each of the major branch circuits of your car. This makes the job of mounting the fuse panel easier than any other "integrated fuse panel" system on the market. Once the fuse panel location has been selected, the instrument panel wiring can be completed. The remaining 4 branch circuits are then connected in orderly fashion utilizing the same modular building approach we employ in our "premier" "Modular Panel System". As with any of our products, we supply easy to follow instructions and pictures to make the installation as smooth as possible. Take a look at the following description of the 5 step modular approach of the Power Plus™ 18 and see why we make the claim that this is the best deluxe function "integrated fuse panel system" on the market today:

1. **Fuse Panel Assembly and passenger compartment wiring to include:**
   a. Instrument panel wiring for:
      1. Fuel, oil, temperature, volts and tachometer dash gauges or warning lights
      2. Turn signal and high beam indicator lights
      3. Wiper, headlight and electric fan switches
      4. A/C and heater control panel switch
      5. Radio and auxiliary radio (CB, cassette, etc.)
   b. Ignition switch wiring for either dash or column mounted switch
   c. Dimmer switch wiring for either floor or column mounted switch
   d. Brake switch wiring
   e. Steering column wiring for turn signal switch, 4-way flasher and horn
   f. Neutral safety switch leads for automatic or manual transmission
   g. Dome or courtesy light
   h. Accessory wiring for the following popular options:
      1. Cruise control
      2. Clock
      3. Cigarette lighter
      4. Electric Fuel Pump
      5. Power Seats
      6. Power Windows
      7. Power Door Locks
2. **Front Lighting wiring to include:**
   a. Headlights (high and low beam)
   b. Parking lights and turn signals
   c. Horn
   d. Electric fan

3. **Engine Compartment wiring to include:**
   a. Oil pressure, water temperature and tachometer leads
   b. Distributor and coil leads (GM, Ford or Chrysler) (HEI or point type)
   c. Alternator leads (GM, Ford or Chrysler)
   d. A/C compressor lead wire
4. **Engine Starter, solenoid and neutral safety switch wiring.**
5. **Rear Lighting wiring to include:**
   a. Rear tail lights, brake lights and turn signals
   b. License light
   c. Third brake light
   d. Fuel level tank sender

Aside from the "standard" features identified, the Power Plus™ 18 system incorporates the following technical features at no extra cost:

- Insulated fuse panel base measures 3.5 x 4.0 inches allowing maximum mounting flexibility.
- Rugged factory terminals and termination techniques to eliminate problems of loose and incomplete terminations in the fuse panel.
- Reduced system wiring time. Test studies have proven a substantial reduction in installation time over other "integrated fuse panel" systems making it the easiest of its type to install.
- General Motors color coding system for ease of maintenance.
- Superior high temperature, fire and abrasion resistant cross link polyethylene wire made to withstand operating temperatures of -60F to +275F.
- Correct wire gauge size for all circuits. Wire gauge sizes range from 18 to 10 gauge depending on the amperage load of the circuit.
- Computer ink-jet printed wire identifying each circuit as to function.
- Complete serviceability of all parts. Relays, fuses and flashers are available at your local parts store.
- Highly detailed computer generated installation instructions included for each and every branch circuit module of the system.
- Total flexibility for complete customization to your specific vehicle.
- Technical assistance for the life of the system.

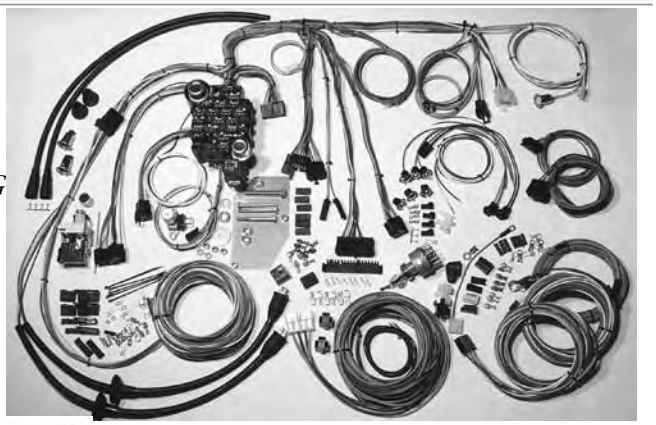
CLASSIC UPDATE SERIES WIRING HARNESSES

by American Autowire

Classic Update Series wiring system is specially designed for 1955, 1956 and 1957 cars. There is no other wiring system on the market that compares to its depth of features and ease of installation. Built around and in conjunction with such after market manufacturers as AUTOMETER, CLASSIC INSTRUMENTS, DAKOTA DIGITAL DASH, FLAMING RIVER, HOTROD AIR, IDIDIT, PACIFIC WESTERN'S "RAIN GEAR", STEWART WARNER, VINTAGE AIR, VDO, the Classic Update Series is the perfect system to bring your "Tri-5" electrical system up to date and beyond.

55-56	All body styles	500423	549.00
1957	All body styles	500434	549.00



Fuse box and custom mounting plate designed for bolt in under dash installation. All required hardware supplied. Location selected for easy accessibility and clearance of under dash accessories such as DAKOTA DIGITAL instruments, RAINGEAR wiper system, VINTAGE AIR heat and air conditioning systems, IDIDIT and FLAMING RIVER steering columns and late model GM tilt steering columns.

Rear body harness assembly that is specially designed to plug into the main harness in the original under dash position to utilize existing retention clips. Flexibility in harness design allows for original or custom routing.

Replacement headlight switch with internal circuit breaker included. Retention collar nut, adjustable length shaft and custom knobs are also included. Extra connectors and instructions are supplied for installation of 1955-56 and 1957 headlight switches.

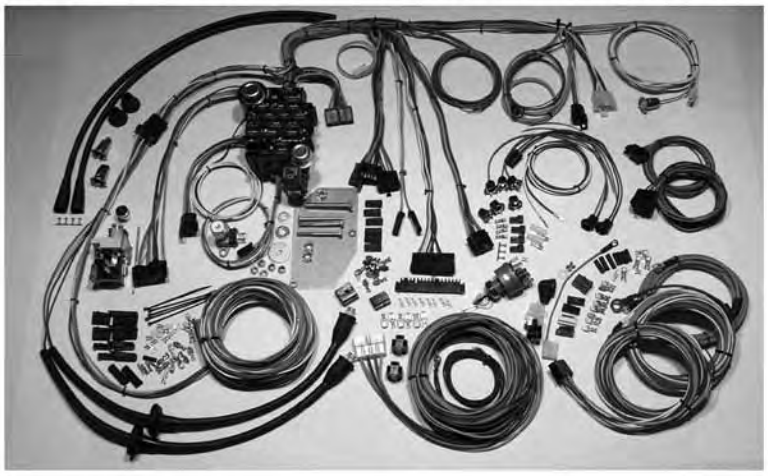
Rear body wiring includes backup light lead wires and mating connectors for back-up lamp assemblies. License plate connectors and terminals included. Fuel tank sender wire and terminals included for original style door jamb switches and overhead dome lamp.

Accessory disconnect provided for connections to power windows, power seats, cruise control, fuel pump, power door locks, extra radio or optional power accessory.

New floor dimmer switch is provided. Wire length and connection accommodate original floor mount dimmer switch.

Original design rear body weatherproof boot and tube assemblies and original design light sockets make attachment to tail light assemblies an easy plug-in. Lead wires are long enough to accommodate all body styles, including wagons.

The Power Is Built Into The Classic Update Series!



Headlight bucket grommets, parking light weatherproof boot and tube assemblies and light sockets are included for 1955-56 . parking light bar component supplied for 1957.

Steering column connectors will plug directly into most aftermarket steering columns utilizing GM turn signal switches as well as late model GM columns from 1969 and later. Original columns can also be wired by using the supplied main connector and terminals.

Heater control panel lighting, power, and blower motor leads are included for original style heaters as well as aftermarket heat and A/C updates such as Vintage Air. Connections are also wired in for the glove box, cigarette lighter and even the original clock in the passenger side bezel.

New ignition switch is included with indexed connector. Additional connectors and instructions are provided to use the original 1955-56 and 1957 ignition switches.

Instrument cluster wiring is designed with a "cluster harness disconnect". This makes service easier by unplugging and removing the cluster housing. All original terminals, connectors, and light sockets are supplied for original cluster gauges. However, the best aspect to the disconnect is that any gauge cluster package can be easily and neatly wired in. This includes DAKOTA DIGITAL, VDO, AUTOMETER, ROD TECH, CLASSIC INSTRUMENTS and STEWART WARNER.

Ignition switch connectors for GM steering columns with ignition switch in the column are included.

Engine wiring includes connectors for both points type and HEI distributors. Power and tachometer connectors supplied for GM HEI distributors. Alternator connectors are supplied for GM "SI" series internal regulator alternators.

Engine wiring includes standard starter and gauge sender leads for water temperature, oil pressure and tachometer. heavy 8 gauge alternator leads are supplied. Power circuits are fusible link protected.

Front lighting includes extra long leads for special routing when custom under hood appearance is desired. All headlight, parklight and directional light connectors and terminals are provided, as well as, wiring for electric engine fan.

SHEET METAL PATCH PANELS

Lower Front Cowl Panel

Replaces the lower front cowl where the front fender bolts to the main part of the body. Extends from the firewall to the front door opening and from the bottom of the rocker line upward 12" to 15", depending on the application. 18 gauge stamped steel.

Replacement Door Bottom Repair Kit

The door bottom kit includes the outer door skin and the inner structure for one door. The outer skin is precision die-stamped from 20 gauge steel with all the proper curves and shaped 6" high and the hem flange on the outer skin is included and formed to a reverse 45 degree angle for proper assembly to the inner door structure. The inner door structure is a one piece die-stamped section from 18 gauge steel with all the proper steps for the door jamb. Cross braces and other features from the original doors are included.

The Chevy restorers at Obsolete Chevy Parts are proud to offer a fine selection of premium quality Sheet Metal Components for vintage Chevrolet cars. Made from heavy gauge steel like the OEM parts, these high quality panels are the professional way to make body repairs that should last as long as your car. Used original parts are scarce and expensive, and may require lots of skilled labor just tomake them suitable for use on your project.

Call today for the panels you need.

Sheet Metal – ’49-52

Front Toe Board

The toe boards are a die-stamped part which repairs the angles area of the front floor from firewall to the main flat floor. Extends from the transmission hump to the inner kick panel

It's the "little details" that make the difference between great restorations and tacky looking old cars. Kick Panels, Arm Rests, Door Lock Knobs, Window Cranks, and many other "small parts" work together like notes in a song, to provide the harmony of a beautiful "new-car" interior. Detail the inside of your classic Chevy, and watch the spectators' appreciation grow.

Remember the lowly clips and fasteners! Body moldings and other trim items are often held firmly in place by small, inexpensive clips and other fasteners. We collectors rarely ever think of them, until they fail. Then an expensive piece of trim may hang loosely from the body, or even fall off while we drive down the road. Don't take chances; order new clips and fasteners for all your trim items.

Limited Quantities of NOS Items.

Please inquire on other years or other sheet metal items.

GLASS

Look closely at the glass in your vintage Chevrolet. Old glass often seems pretty good, until you examine it carefully. You will often find "bubbles" near the edges, where the layers have begun to delaminate. It is also common to find areas where the plastic sandwiched in between layers of glass has become slightly murky, which reduces clarity. Then there are those thousands of microscopic pits caused by years of sand, grit, and wind and weather. You may not even realize it, but old glass can often cause a faded or "dingy" look to your car. Get brand new glass for your Chevy today!

Most glass is special order. Sash Channels (bottom of glass fits into this channel) are listed at 10.685 front door, 10.747 rear door and 11.007 quarter window.

Shop Manuals

If you have a vintage Chevrolet, get the shop manual for that specific model! So much useful information is right there at your finger tips. You'll love these beautiful reproductions of the same manuals which were used by Chevrolet dealership mechanics when your car was brand new. And since it is a reproduction instead of a precious old original, you'll know that the pages are bright white, easy to read, and NOT old and fragile. It's okay if you get a fingerprint on a page or two! And don't forget our shop manuals on CD, for the ultimate in convenience!

Ordering & Shipping Information

Obsolete Parts Co. Inc. has been in business since 1968 offering quality parts for Chevrolets. Owned and operated by Tim Tygart.

Ordering Methods: You can place your charge card or COD order (money order or cashier's check) by calling 1-800-248-8785 or by faxing your order to (229) 686-3056. You can also order online at www.obschevy.com. Minimum charge card or COD order is $10.00. Some items are special order and must be prepaid.

Mail in orders should be addressed to:
P.O. Box 68, Nashville, Ga 31639-0068.

An order blank is provided on pages 131 and 133. On orders shipped within the states (we do not charge a percentage for shipping) we suggest estimating 15% of orders less than $100 ; $18.50 plus 5% for orders over $100. Minimum shipping charge is $12.00. Some orders require several boxes or special packaging. Payment of the order plus a $45 crating fee is required before the order is shipped. International orders will be shipped UPS Air unless another carrier is requested, international customers please also refer to additional information in "Shipping Information". Please use your Customer Number or Phone Number when placing an order.

Prices: Due to periodic price increases from our suppliers, prices are subject to change without notice. Updated catalogs are included with an order upon request at no charge. We do not maintain a mailing list.

Payment: We accept MasterCard, Visa or Discover card for purchases of $10 or more. We also ship COD within the continental United States. UPS no longer accepts cash on cod's, money order or cashier's check is required. We also accept money orders, cashier's check or personal check for mail-in orders. Personal checks are subject to be held 10 days for clearance. Charge card or postal money order in U.S. funds is required for Canadian and international customers.

Shipping Information: Orders shipped within the U.S. are shipped UPS unless another carrier is requested. Please supply a business shipping address whenever possible. Canadian customers please specify UPS or Post Office. All other international orders will be shipped UPS Air (see additional information below). Some orders are too large or heavy for UPS or Post Office and will be shipped truckline. We charge a $45.00 crating fee on truckline shipments. If the carrier is unable to deliver the package and it is returned to us, you will be responsible for the freight cost incurred before another order can be shipped.

International Customers: All orders will be shipped UPS Air unless another carrier is requested. We will only ship United States Post Office to areas where the packaged can be insured. We must have a written or faxed copy of the order. Phone orders will not be accepted. A processing fee of 10% of the invoice total will be added to all orders.

Returns: Special order items, such as interior kits, carpet, radios, and air conditioning units are not returnable. Merchandise must be returned in original condition. We reserve the right to replace incorrect or defective merchandise. Please include a copy of the invoice and state the reason for return. Some returns may be subject to a 15% restocking fee. Items originally purchased by credit card will be credited to the charge card; other returns will be refunded by company check. Refund checks will be mailed the week following the return being received.

Our street address is
524 Hazel Avenue, Nashville, Ga 31639

Backorders: Any items not available for shipment when your order was placed will be backordered and shipped as soon as possible. You will be charged for the part and shipping cost when the item is shipped. These items will be listed on the invoice as backordered. Please notify us if you wish to cancel a backorder.

Damage Claims, Shortages & Incorrect Merchandise: Your order has been pulled, checked and carefully packaged to insure your order is received correctly and in good condition. Please open your package immediately and verify you have received the items you were billed for and that they are in good condition. Before reporting missing parts, inspect all packaging materials since many parts are wrapped in cardboard or paper; also check the box to make sure it has not been opened and retaped and then notify Obsolete Chevrolet. We use brown tape on our packages, UPS will use clear tape to retape an opened package. Damage claims or shortages for UPS or Post Office shipments must be reported within 3 days of receipt of shipment. All shipments are insured. If you are reporting a damage, please retain the box and packaging materials for inspection by the carrier. Notify the carrier of the damage. If it was shipped UPS, call 1-800-742-5877 or contact your local post office for post office deliveries. The carrier will inspect the package and return the damaged parts to us. We will ship a replacement part to you. If you believe you have received an incorrect part, call us and we will assist you in getting the correct part. If your order is shipped Truckline, please open and inspect the package before signing and releasing the shipment. If the shipment has been damaged, have the driver detail the damage on the bill of lading before you sign for the package. Call Obsolete Chevrolet and we will handle the claim with the truckline. Save all packaging materials. If you release the package from the truckline without inspecting the part(s), Obsolete Parts Co., Inc and the delivering truckline are not responsible for any damages.

Guarantee: All parts are guaranteed against defects in manufacturing and workmanship. Liability of Obsolete Chevrolet is limited to the replacement of the part.

Company Information: We are located 220 miles south of Atlanta. If you are traveling South on Interstate 75, exit at #62 to Hwy 82 East. Go approximately 15 miles and turn South on Hwy 129 in Alapaha. Nashville is about 10 miles. Continue South thru Nashville and take a left at Hardee's on Hazel Avenue. We are on the left, about 1 mile. If you are traveling North on Interstate 75, exit #39 and take Hwy 76 East about 12 miles to Nashville. Straight under the red light to Hazel Avenue, we are on the left about 1 mile.
